

Project- Website for an Architectural Firm

This was a Capstone project by Coursera. The first two pages are made from scratch with HTML5, CSS and JavaScript. And the rest of the pages are made with the help of a template.

Index page:

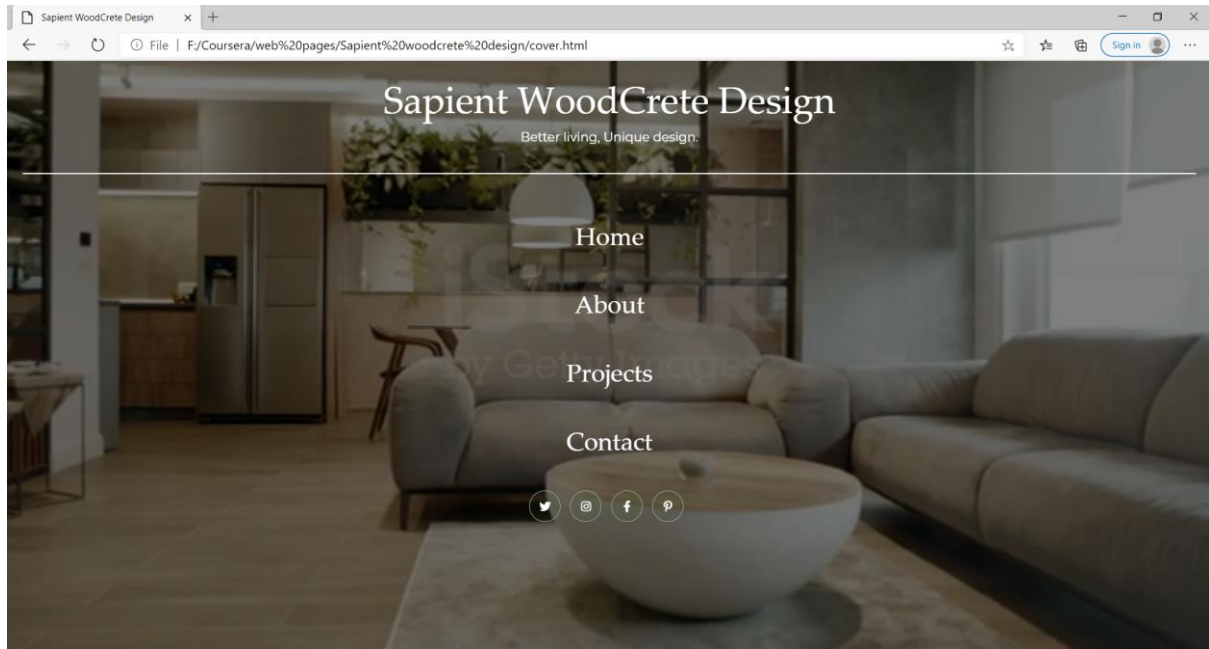

For this page, the Carousel is used. There are three slides on autoplay with a variation of a few seconds. An arrow is also provided on both sides to control the carousel manually. When clicked on the navigation button on the top right the 2nd page will open.

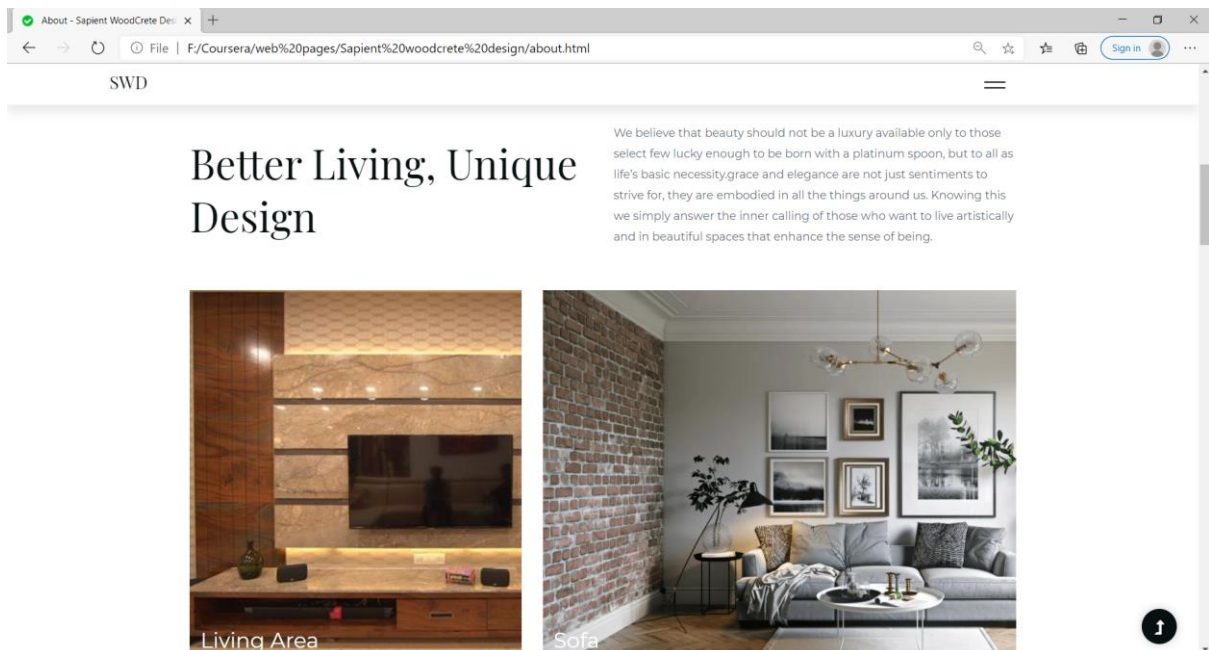

2nd page:

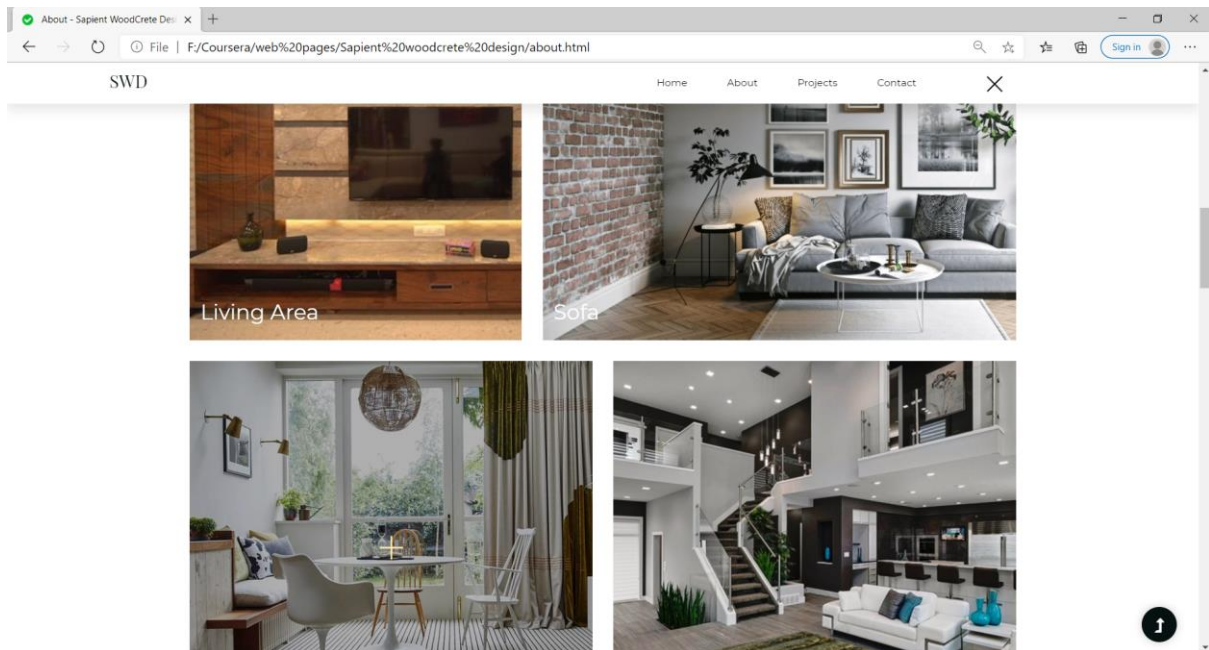

There is a video in the background.

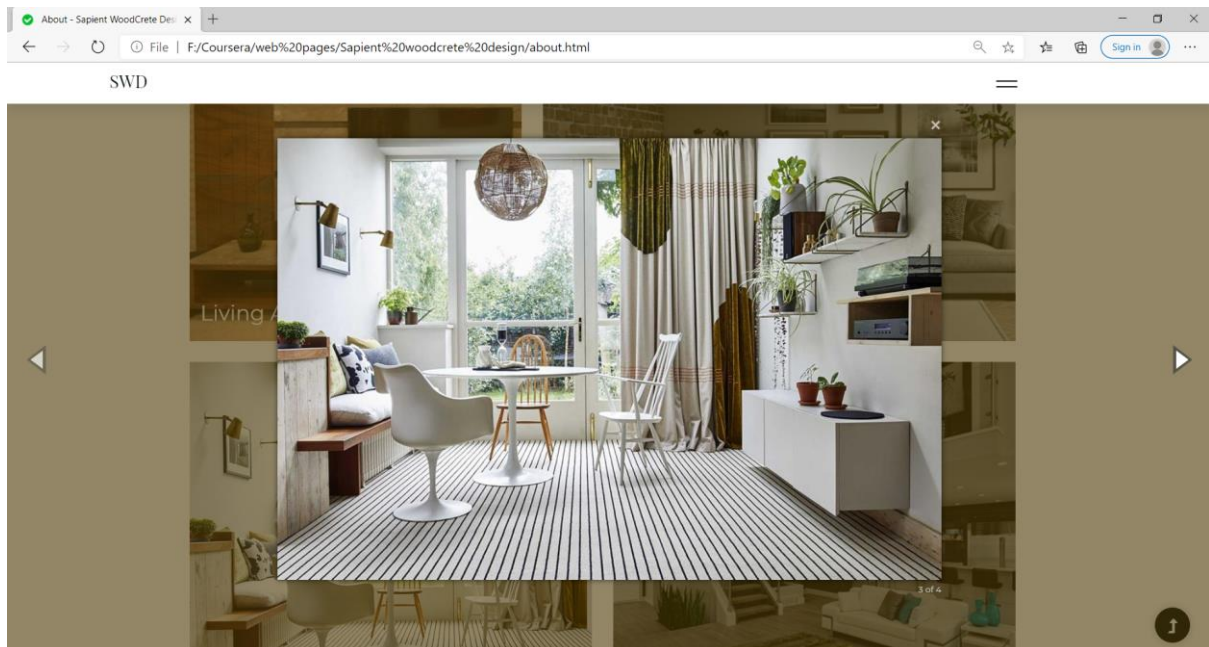

3rd page (About):

This page contains brief information about the firm.

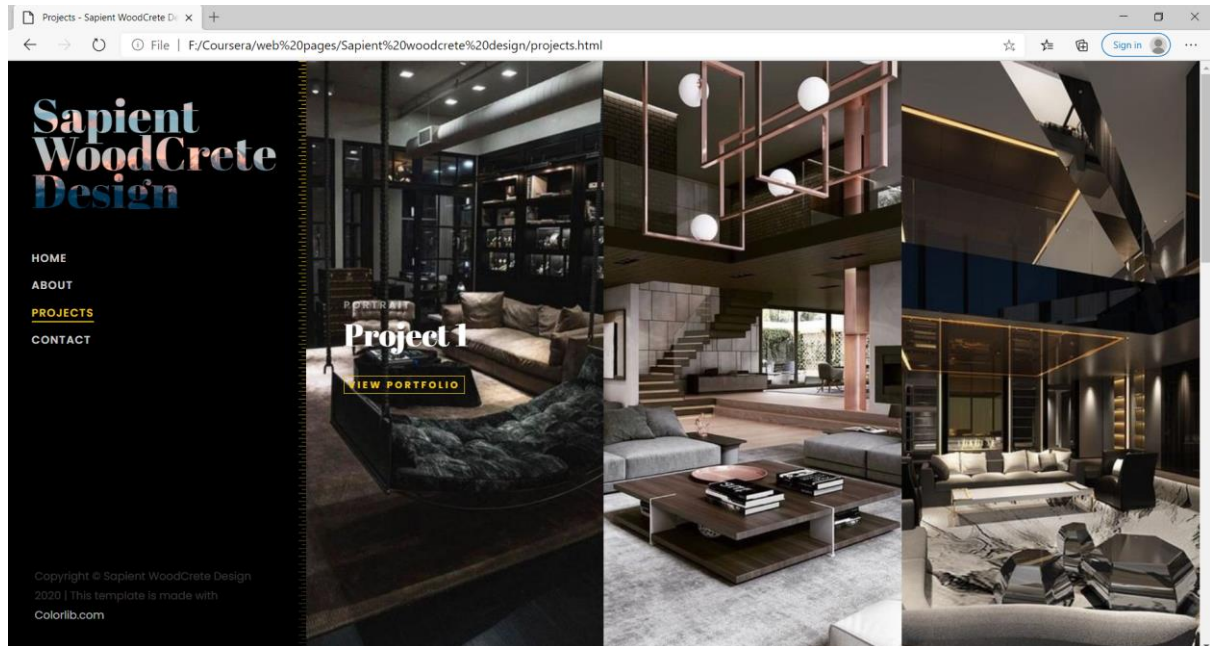

When clicked on any of the images another carousel will pop up giving a wider view of the images. It also contains arrows on both sides for manual control.

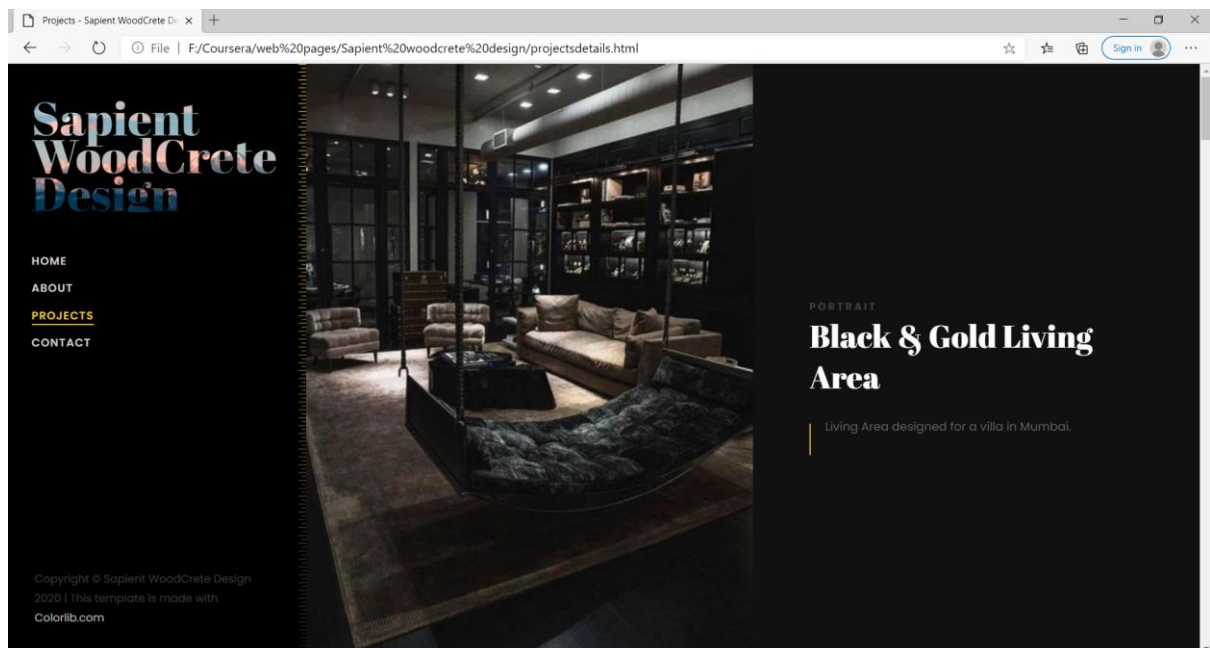

4th page (Projects):

This page contains the pictures of projects done by the firm so far. When clicked on view portfolio 5th page will open.

5th page:

This page gives details of each project.

6th page (Contact):

This page has a form for those who would like to leave a message. And the contact information is also provided.

The screenshot shows a web browser window with the URL `F:/Coursera/web%20pages/Sapient%20woodcrete%20design/contact.html`. The page is titled "SWD" and "Get in Touch". It features a contact form with the following fields:

- A large text area labeled "Enter Message".
- Two input fields labeled "Enter your name" and "Email".
- A single-line input field labeled "Enter Subject".
- A "SEND" button.

On the right side of the form, there is contact information:

- Address: Buttonwood, Mumbai, Rosemead, CA 91770.
- Phone: +1 253 565 2365, Mon to Fri 9am to 6pm.
- Email: support@gmail.com, Send us your query anytime!

The browser window also shows a "Sign in" button in the top right corner.

Does the site validate?

Yes, here is a screenshot of online validator checking the code for any errors.

The screenshot shows the "Nu Html Checker" website. The browser window has the URL `validator.w3.org/nu/#textarea`. The page title is "Nu Html Checker". Below the title, it says "This tool is an ongoing experiment in better HTML checking, and its behavior remains subject to change".

The "Showing results for contents of text-input area" section shows the "Checker Input" field with the following HTML code:

```
<!DOCTYPE html>
<html lang="en">

<head>

  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">
  <meta name="description" content="">
  <meta name="author" content="">

  <title>Sapient WoodCrete Design</title>

  <!-- Bootstrap core CSS -->
  <link href="vendor/bootstrap/css/bootstrap.min.css" rel="stylesheet">

</html>
```

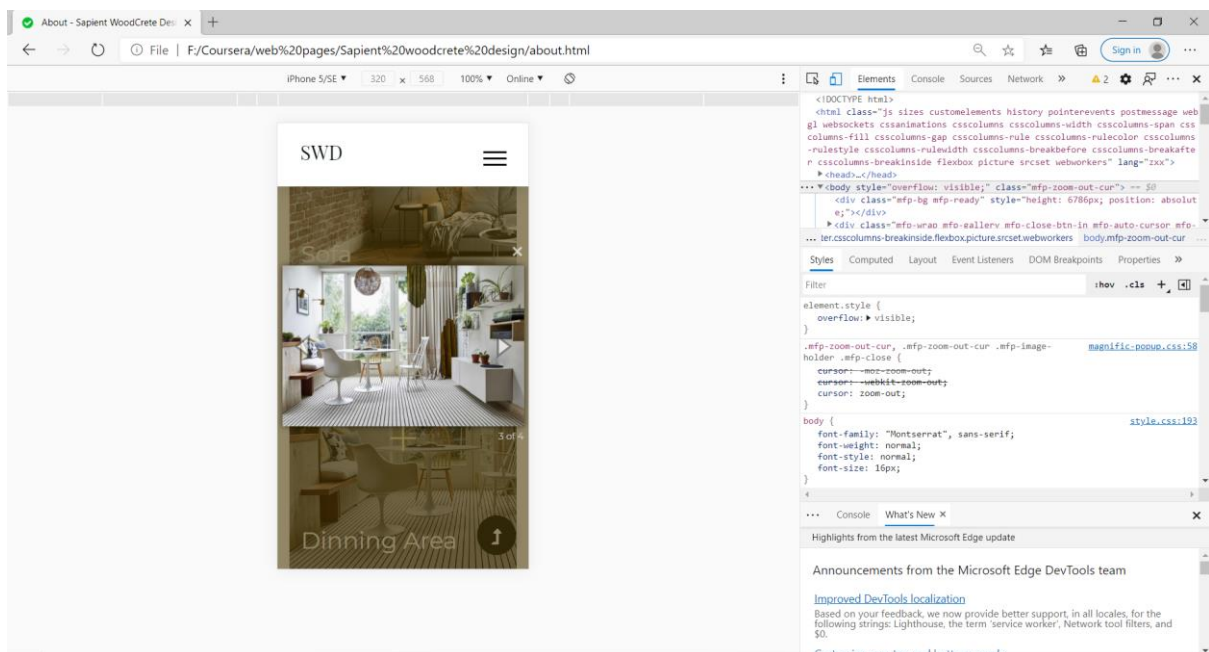

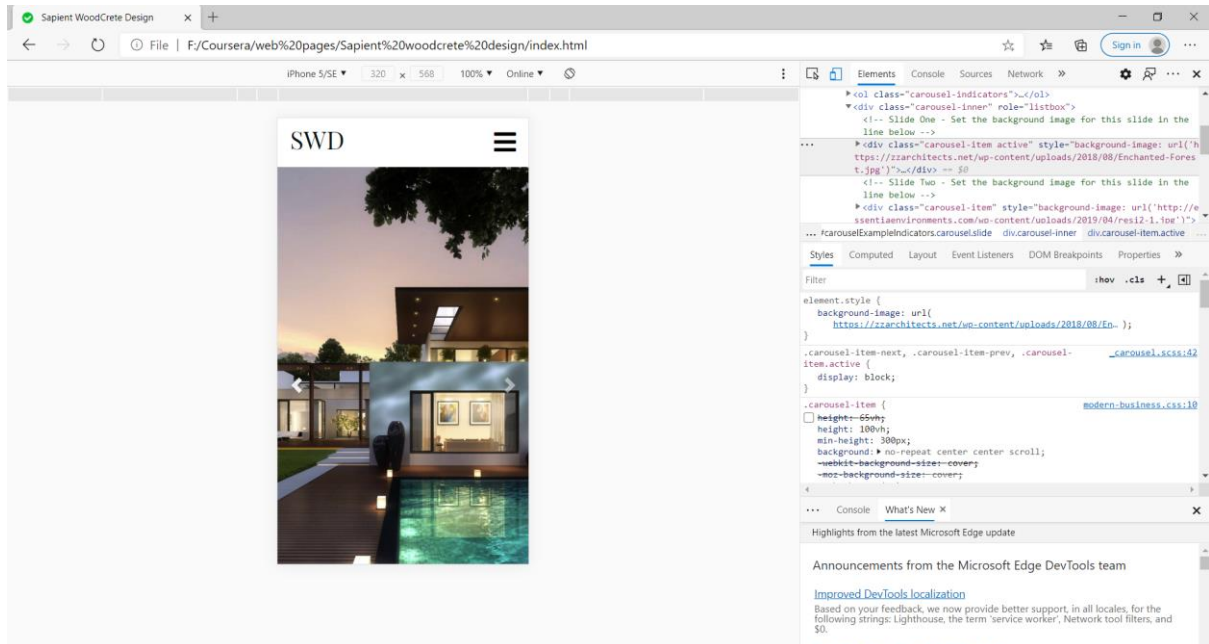

The "Check" button is visible. Below the input field, it says "Use the Message Filtering button below to hide/show particular messages, and to see total counts of errors and warnings." The "Message Filtering" button is visible.

A green banner at the bottom of the page states: "Document checking completed. No errors or warnings to show." Below this, the "Source" section shows the following HTML code:

```
1. <!DOCTYPE html>+
2. <html lang="en">+
3. <head>+
4. <meta charset="utf-8">+
5. <meta name="viewport" content="width=device-width, initial-scale=1, shrink-to-fit=no">+
6. <meta name="description" content="">+
7. <meta name="author" content="">+
8. <title>Sapient WoodCrete Design</title>+
9. <!-- Bootstrap core CSS -->+
10. <link href="vendor/bootstrap/css/bootstrap.min.css" rel="stylesheet">+
11. </html>+
```

Is the site responsive?

Yes, here are screenshots of Mobile view of the site
